

AZ 410

Connecting lanyard

EN 354, EN 795/

The AZ 410 connecting lanyard is a component of fall protection equipment. When combined with an energy absorber (e.g. ABM) it forms a connecting and shock absorbing device. The connecting lanyard is a portable anchor point complying with EN 795/B. The line is suitable for securing 3 users at a time using the AE 320 device. Steel cable fitted with loops with thimbles at both endings. The middle part of the lanyard is protected by a transparent plastic tube.
